**Excerpt / Brief Summary:**

India ranked first among 41 global markets in the Global Business Climate Survey 2026, with 73% of surveyed Swedish companies rating India's business environment as good or very good. The survey, jointly produced by Business Sweden and the Swedish Chambers of Commerce, evaluates factors such as business performance, profitability, investment plans and operating conditions across major economies. For UPSC aspirants, the survey is important for understanding investment sentiment, ease of doing business, foreign direct investment and India's position in global value chains.

**UPSC Relevance**

**Prelims:** Global Business Climate Survey, Business Sweden, Swedish Chambers of Commerce, India ranking.

**GS Paper 3:** Indian Economy, Investment Models, FDI, Industrial Growth and Global Value Chains.

**Essay:** India as a Global Investment Destination, Ease of Doing Business, Manufacturing Competitiveness.

## What Is the Global Business Climate Survey?

The Global Business Climate Survey is an annual international survey that captures the operating experiences and expectations of Swedish companies working across major global markets.

It evaluates factors such as:

- business performance;
- profitability;
- market conditions;
- investment intentions;
- regulatory environment;
- economic outlook;
- ease of doing business.

The survey provides a business-level view of how companies perceive different national markets.

## Who Publishes the Survey?

The Global Business Climate Survey is jointly produced by:

- **Business Sweden**; and
- **Swedish Chambers of Commerce** operating across international markets.

**Prelims Fact:**

The survey is **not** published by the World Bank, International Monetary Fund or World Economic Forum. It is associated with **Business Sweden and Swedish Chambers of Commerce.**

## When Was the Survey Launched?

The Global Business Climate Survey was first introduced in **2020**.

CIVIL SERVICE GURUKUL
www.civilservicegurukul.com

The 2026 edition was the largest edition so far, covering **41 major global markets**.

## India's Ranking in 2026

| Indicator | Result |
|---|---|
| India's Overall Ranking | **1st** |
| Total Markets Covered | **41** |
| Companies Rating India Good / Very Good | **73%** |
| Position in Global Top Three | Fourth consecutive year |
| Other Top Markets | Ireland and Vietnam |

## Top Three Markets in 2026

1. **India**
2. **Ireland**
3. **Vietnam**

These markets stood out for factors including economic momentum, business confidence and investor sentiment.

> **Exam Tip:**
>
> Do not confuse this ranking with the old World Bank **Doing Business Index**. The Global Business Climate Survey is based specifically on the experience and outlook of Swedish companies operating internationally.

## Why Did India Perform Strongly?

India's strong ranking reflects several broad economic trends.

### 1. Strong Economic Growth

India continues to be one of the world's fastest-growing major economies, creating opportunities across consumer, infrastructure, manufacturing, services and technology sectors.

CIVIL SERVICE GURUKUL
www.civilservicegurukul.com

### 2. Large Domestic Market

India's population and expanding middle class create significant demand for:

- consumer goods;
- financial services;
- digital products;
- healthcare;
- mobility;
- industrial products.

### 3. Expanding Manufacturing Base

Policies supporting domestic manufacturing and global supply-chain integration have increased interest in India as a production base.

### 4. Digital Public Infrastructure

India's digital ecosystem has reduced transaction costs and expanded digital access for businesses and consumers.

### 5. Supply-Chain Diversification

Global companies are increasingly seeking alternatives to excessive concentration in a limited number of production markets.

India can benefit from this diversification if it continues improving logistics, infrastructure and regulatory predictability.

## What Did Swedish Companies Say About India?

Around **73% of surveyed Swedish companies** rated India's business climate as good or very good.

India also recorded strong expectations concerning:

- revenue growth;
- market expansion;
- future investment;
- business profitability.

CIVIL SERVICE GURUKUL
www.civilservicegurukul.com

India, along with markets such as the Philippines and Poland, recorded strong market-level revenue and growth expectations.

## What Does the Survey Say About Global Profitability?

Despite geopolitical and economic uncertainty, approximately **64% of Swedish companies globally reported profitability**.

Around **80%** maintained either a neutral or positive business outlook.

This suggests that multinational firms remain broadly optimistic despite global disruptions.

## Investment Outlook

Approximately **44% of Swedish firms globally** indicated plans to increase investment over the following twelve months.

The Asia-Pacific region emerged as a major destination for planned capital allocation.

**Why This Matters for India**

A positive business climate can translate into:

- higher foreign investment;
- technology transfer;
- greater manufacturing capacity;
- employment creation;
- integration into global supply chains.

## What Business Strategies Were Associated With Success?

The survey highlighted three important factors influencing business performance:

- **cost discipline;**
- **strong sales execution;**
- **integration with domestic supply chains.**

CIVIL SERVICE GURUKUL
www.civilservicegurukul.com

For foreign companies operating in India, localisation can therefore become an important competitive advantage.

## Why Local Supply Chains Matter

Foreign companies that integrate with local suppliers can benefit from:

- lower logistics costs;
- faster delivery;
- better market adaptation;
- reduced external supply-chain risk;
- greater domestic value addition.

This is also relevant to India's broader goal of increasing manufacturing and domestic industrial capability.

## Business Climate vs Ease of Doing Business

The two concepts are related but not identical.

| Business Climate | Ease of Doing Business |
|---|---|
| Broad perception of commercial operating conditions. | Traditionally focused more on regulatory procedures. |
| Includes profitability and growth expectations. | Focused more on formal business processes. |
| May include investor confidence and demand conditions. | Historically measured indicators such as permits and contracts. |
| Global Business Climate Survey is company-perception based. | The World Bank's former Doing Business rankings are discontinued. |

## Why Foreign Investor Confidence Matters

Foreign investment can support economic development through:

- capital formation;
- technology transfer;
- managerial expertise;
- exports;

CIVIL SERVICE GURUKUL
www.civilservicegurukul.com

- employment;
- higher productivity;
- integration into global value chains.

## What Does India's Ranking Not Mean?

A first-place ranking does not imply that India's business environment has no structural challenges.

> **Important Analytical Point:**
>
> Business-climate surveys reflect the perceptions of surveyed firms. They should be interpreted alongside broader indicators of investment, infrastructure, regulatory quality, labour productivity and institutional performance.

## Challenges India Still Needs to Address

### 1. Regulatory Predictability

Investors value stable, clear and consistently implemented regulations.

### 2. Contract Enforcement

Efficient commercial dispute resolution improves confidence and reduces business risk.

### 3. Logistics Costs

Improving multimodal transport and supply-chain efficiency remains important for manufacturing competitiveness.

### 4. Skill Availability

High-growth manufacturing and technology sectors require a continuously upgraded skilled workforce.

### 5. Infrastructure Quality

Reliable power, transport, ports, digital infrastructure and industrial clusters remain central to business performance.

CIVIL SERVICE GURUKUL
www.civilservicegurukul.com

### 6. MSME Integration

India's large MSME sector must be better integrated into the supply networks of multinational and large domestic companies.

## India and Global Value Chains

One of India's major economic opportunities is to capture a larger share of global value chains.

A strong business climate can help attract investment in:

- electronics;
- automobiles;
- renewable energy;
- pharmaceuticals;
- industrial machinery;
- semiconductors;
- advanced manufacturing

## How Can India Sustain Its Investment Advantage?

1. **Ensure policy stability** to improve long-term investor confidence.
2. **Reduce logistics costs** through integrated infrastructure.
3. **Improve dispute resolution** and contract enforcement.
4. **Strengthen skill development** for emerging industries.
5. **Promote domestic supplier networks** and MSME participation.
6. **Maintain macroeconomic stability** and predictable taxation.
7. **Deepen trade integration** to connect Indian manufacturing with global markets.

## UPSC Prelims Quick Revision

- **Global Business Climate Survey:** Annual international survey of Swedish companies.
- **India's Rank in 2026:** No. 1 among 41 markets.

CIVIL SERVICE GURUKUL
www.civilservicegurukul.com

- **Top Three:** India, Ireland and Vietnam.
- **India Rating:** 73% of surveyed Swedish firms rated the business climate good or very good.
- **Publisher:** Business Sweden and Swedish Chambers of Commerce.
- **First Launched:** 2020.
- **Global Profitability:** Around 64% of surveyed Swedish firms reported profitability.
- **Investment Outlook:** Around 44% planned higher investment over the following 12 months.

## UPSC Mains Enrichment

**Possible Question:**

"India's improving business climate offers an opportunity to integrate more deeply into global value chains. Discuss the factors supporting this trend and the structural challenges that remain."

**Introduction:**
Mention India's strong performance in global business sentiment surveys.

**Positive Factors:**
Large market, economic growth, digital infrastructure, manufacturing reforms and supply-chain diversification.

**Challenges:**
Regulatory predictability, logistics costs, contract enforcement, skills and MSME integration.

**Way Forward:**
Reforms + infrastructure + skills + stable policy + export competitiveness.

**Conclusion:**
Sustained competitiveness depends on converting positive investor sentiment into long-term productive investment.

## Possible UPSC Questions

1. “Discuss the significance of India's first-place ranking in the Global Business Climate Survey 2026.”
2. “Investor confidence is necessary but not sufficient for sustained economic competitiveness. Examine.”
3. “How can India convert favourable business sentiment into greater participation in global value chains?”

## Frequently Asked Questions

### What is the Global Business Climate Survey?

It is an annual survey assessing the business experiences and expectations of Swedish companies operating across international markets.

### Who publishes the survey?

It is jointly produced by Business Sweden and Swedish Chambers of Commerce.

### What was India's rank in 2026?

India ranked first among 41 surveyed markets.

### Which countries followed India?

Ireland and Vietnam were among the other leading markets.

### Why is the survey important for UPSC?

It connects with investment sentiment, FDI, manufacturing competitiveness, ease of doing business and global value chains.

For UPSC Prelims, remember the three core facts:

- India ranked No. 1 among 41 markets;
- the survey is associated with Business Sweden and Swedish Chambers of Commerce;
- 73% of surveyed Swedish companies rated India's business climate good or very good.

CIVIL SERVICE GURUKUL
www.civilservicegurukul.com

For Mains, avoid treating the ranking as proof that all business constraints have disappeared. A stronger answer links positive investor sentiment with the need for continued reforms in logistics, regulation, contract enforcement, skills and domestic supply-chain integration.

## Conclusion

India's top ranking in the Global Business Climate Survey 2026 reflects strong confidence among Swedish companies in the country's growth prospects and investment environment.

The ranking strengthens India's image as a major destination for global capital, manufacturing and market expansion.

However, sustaining that advantage will require continuous improvements in productivity, infrastructure, regulatory predictability and integration with global value chains.

The real policy challenge is therefore not simply to rank well, but to convert business confidence into durable investment, employment, technology transfer and broad-based economic growth.
